

Fluorescent Western Standardization Blot

Ready-to-image three-color blot

This pre-processed blot was developed to demonstrate the performance of fluorescence imaging systems, including laser scanners and CCD-based instruments. Three different proteins are detected with antibodies that fluoresce in the red, green, and blue fluorescent channels.

Advantages

- **Convenient** – The easiest way to evaluate the performance of your fluorescence imaging system
- **Reliable** – Quality-controlled, with lot-specific statistics provided for every blot
- **Well-designed** – Both fluorescently labeled primary and secondary antibodies are used, to demonstrate different experimental designs, and the utility of loading controls

Ordering Information

Catalog Number	Product	Size
K-08001-001	Fluorescent Western Standardization Blot	1 each

Related Products

K-12021-010	WesternBright™ MCF fluorescent Western blotting kit (Contains: secondary antibodies, washing solution, blocking solution, pre-cut PVDF membranes and background quenching sheets)	10 blots
L-07001-010	Background Quenching Sheets	10 sheets
